Egypt Gas,

is one of the Egyptian petroleum's sector companies established in 1983, and a pioneer and a specialized company in the Natural Gas distribution systems, the company undertakes all projects on EPC basis (feasibility studies, Engineering, Procurement, Construction, Commissioning & Maintenance of NG, LPG networks).

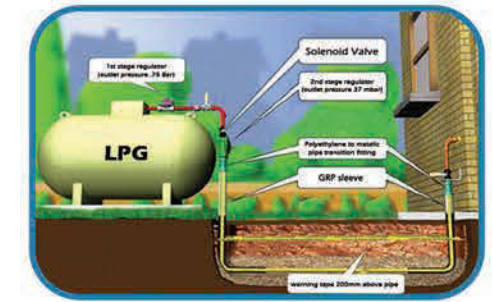

Egypt Gas provided its N.G services to more than 4.2 million Domestic customers, more than 6000 Industrial and Commercial customers (hotels, malls, clubs, restaurants,).

Egypt Gas developed economic, safe and feasible solutions for Off Grid customers using LPG or SNG networks integrated with Gas detection systems.

LPG NETWORKS

Advantages of LPG system

- Many Trade off with an affordable price.
- Uninterrupted LPG supply
- Less number of fueling orders and Longer order intervals.
- Minimize the risk associated with the frequent replacement of Bottles.
- Minimize the risk with dispersed bottles leakage by locating the storage battery/tank in an external area outside the facility.
- More safe due to the usage of the gas/fire detection system.
- Early warning of gas leakage gives time to activate safety procedures and eliminate the danger.
- Shutdown of the LPG supply and the possibility of automatic intervention of safety systems in case of any leakage/fire.
- Following the stipulations of the codes (EN, BS, NFPA, IGEM, OSHA, etc...)

As Safety is the utmost priority, Egypt Gas is the pioneer company in the Petroleum Sector to supply NG/LPG projects with an integrated Gas Detection Systems.

LPG Supply system components: -

- Tank under/above ground central/individual.
- LPG filling pump system
- LPG cylinders battery
- Gas metering system.
- Pressure regulators.
- LPG piping from gas tanks to apartments.
- Vaporizer
- Measuring instruments
- Shut off valves.

Gas detection system components:

1. Gas Probe: detects the presence of gas and sends an alarm signal to the Control Unit.
2. Control Unit: surveillance and control through the remote probes (up to 16 Probes).
3. Solenoid Valve: safety device to shut off the flow of gas

EXAMPLES OF MAJOR BUILDINGS THAT USE NATURAL GAS

SAN STEFANO

ASWAN PLAZA

CITY STARS

SEMIRAMIS

STEIGENBERGER

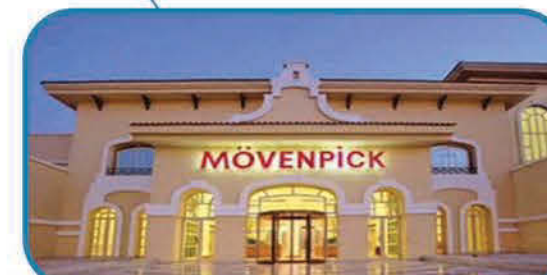

INTERNATIONAL MEDICAL CENTER

Russian University - Badr city

Future University - New Cairo

Movenpick Almain Hotel al - North coast

Reef Oasis Hotel - Sharm Elshiekh

LPG & Gas Detection system in Kuwait

Previous Experience In Kuwait on EPC Basis :
(By Co-Operation with Al-Habdan SSE)
Kuwait international Airport restaurants :
All branches of
(Haya, Zad and Royal Gate restaurants)
